Race control may also permit cars built to the following rules to race. BSCRA 1/24 Production Saloon Cars – see the BSCRA website for full details.

Any car built to the ABSlotsport Pro Falcon 1/24th Sports rules, but fitted with an approved Saloon body.

For full details see the ABSlotsport website - www.abslotsport.biz

Summary of the basic Rockingham 1/24th Production rules

1. Chassis

- a. Any chassis from the BSCRA 1/24th Production approved lists which include the following:
Parma Flexi, Champion Turbo Flex, and JK X24, X25 and X21.
(See the BSCRA website for the full list).

2. Motor

- a. Only the following motors are permitted:
JK Falcon, TSR (D3) Falcon.

3. Body

- a. Any 1/24th Saloon body from the BSCRA Approved Body List—provided that it does not exceed the maximum body height when fitted to a 1/24 Production car.
- b. Bodies must be fully painted, detailed and numbered in accordance with BSCRA guidelines.
- c. Bodies must cover the entire chassis, including the guide, the motor and the wheels, tyres and gears when viewed from directly above.
- d. An interior, including a driver, must be fitted and no part of the chassis or running gear may be visible through the windscreen or windows.

4. Dimensions

- a. Maximum Height of the body must not exceed 35mm.
Note; Bodies may not be modified in any way to achieve this.
- b. Overall Width of the entire car must not exceed 83mm.
- c. Rear Wheels and Tyres.
Maximum width - 21mm.
Minimum diameter – none.
